

HTACCESS

How do you remove multiple slashes in URI HTACCESS

<http://domain.com/test/test/> > <http://domain.com/test/test>

```
# Strip trailing slash(es) from uri
RewriteCond %{REQUEST_FILENAME} !-d
RewriteRule ^(.+?)[/]+$ $1 [NC,R,L]
```

<http://domain.com//test//test//> > <http://domain.com/test/test/>

```
# Merge multiple slashes in uri
RewriteCond %{THE_REQUEST} ^[A-Z]+\ //*(.+)/+(.*)\ HTTP
RewriteRule ^ /%1/%2 [R,L]
RewriteCond %{THE_REQUEST} ^[A-Z]+\ //+(.*)\ HTTP
RewriteRule ^ /%1 [R,L]
```

Change R to R=301 if everything works fine after testing...
